DIY Macrame Plant Hanger Guide

Follow these easy step-by-step instructions to craft your own stylish macrame plant hanger.

Step 1: Prepare Your Cords

Cut 8 pieces of macrame cord, each about 12 feet long. If using a larger pot, add extra length. Fold all cords in half and loop them through the ring (if using) to create 16 strands. Pull tight to secure the cords around the ring.

Step 2: Create the Top Knot

About 3 inches below the ring, tie a simple overhand knot with all the cords. This will hold the cords together and form the base of your hanger.

Step 3: Make the First Row of Knots

Separate the cords into groups of 4. In each group, tie a square knot: Take the left cord over the middle two cords and under the right cord. Take the right cord under the middle two cords and through the loop on the left. Pull tight. Reverse the process and pull tight to complete the knot. Repeat for all groups of cords.

DIY Macrame Plant Hanger Guide

Step 4: Create the Netting

Measure about 6 inches below the first row of knots and split each group of 4 cords into 2 pairs. Take one cord from each pair and tie another square knot to connect the cords. This forms the netting to hold your pot. Repeat around the entire hanger.

Step 5: Finish the Hanger

About 4 inches below the last row of knots, gather all the cords together and tie a large overhand knot to secure the base. Trim any excess cord to create a neat tassel. Place your plant pot in the netting and adjust the cords as needed. Hang your new macrame plant hanger.
